

Federal Communications Commission
445 12th Street, SW
Washington, D.C. 20554
In the Matter of the Creation of a Low Power FM Service
MM Docket No. 99-25

September 13, 2011

Dear Commissioners:

The 1,675 letters included here in four separate attachments were collected through an e-action website administered by the Media and Democracy Coalition to enable public participation in the low power radio proceeding.

The letters, which are addressed from constituents to their elected officials in Congress as well as to the Federal Communications Commission, ask that channels be reserved for low power community radio in the home districts of their authors.

Sincerely,

Brandy Doyle
Policy Director
Prometheus Radio Project
(a member organization of the Media and Democracy Coalition)
P.O. Box 42158
Philadelphia, PA
(215) 727-9620 x518

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Daniel Stafford
40 N. Tower Rd.

I remember when we had local radio stations with real people as DJs. You could call and interact with them. It would be an opportunity to create local jobs, too. This is community connection.

Sincerely,

This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Marshall Berzon
88 Purdue Ave.
Kensington, CA 94708

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
Barkem McLaughlin

Chicago, IL 60647

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

John Shields
4017 Victory Dr.
Austin, TX 78704

Philadelphia, PA 19147

Honorable Congress person and FCC Commissioners,

We need to hear the voice of community organizations.

Low Power FM LICENSES provide a legal, regulated way to establish small FM transmitters that serve a local community or organization.

The FCC must be reminded that the public airwaves are first and foremost a public resource rather than an entitlement for commercial interests to dominate an area for their profit.

This is best effected by having the FCC reserve FM slots or bandwidth for LPFM broadcasters in Miami.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Zsanine Alexander
1339 Norton Ave.
Glendale, CA 91202

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Richard Monsees

Hello -- I strongly support this action. We are really tired of the public airwaves being used to profit a few large media conglomerates who then put a lot of trash and commercials on the airwaves. There's nothing useful on radio and TV, as a result, anymore. I don't even bother listening to broadcast news. It is GARBAGE. The people deserve to get their voice back. The airwaves belong to us. Please give it back. Gary Worth

Chris Hollo
4227 Lindawood Dr
Nashville, TN 37215

Honorable Congress person and FCC Commissioners,

Thank you for taking the time to review this letter of concern over our freedom of speech, and our ability to take advantage of this speech through local communications.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
P. Michael Quinn

Honorable Congress person and FCC Commissioners,

Most of this message came from an advocacy website, and I can't really say it better than them so I'll leave their part be. I would like to add that my experience as a student DJ at WRVU 91.1 FM, Vanderbilt Universities radio station was a fantastic experience. Giving similar access to other students across Tennessee, and the United States, would create many meaningful opportunities for students to interact with communities and explore the airwaves.

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

FM translators can provide valuable service by extending signals to overcome geographic obstructions such as mountains. Recently however, translator use has strayed from this original purpose to simply be a means for stations to expand their market reach. This is apparent in the 2003 translator filing window, known as "The Great Translator Invasion" due to its unprecedented yield of 13,345 applications.

50% of those applications came from just 15 parties. Investigation later brought to light that some firms were also engaging in illegal trafficking of FM Translator licenses, netting over \$800,000 in profit while violating the Communications Act.

Here in Western PA, WDUQ's ownership recently changed hands, with the new licensees constructing a translator in Indiana, PA - about 55 miles and three counties away from its Pittsburgh studios.

Translators are eating up valuable FM frequency that could be better used by community broadcasters and LPFM stations. The massive consolidation of ownership following the Telecommunications Act of 1996 decimated localism on the airwaves - recent abuses of FM translators are similarly marginalizing local broadcast voices.

LPFM is crucially important, and the passage of the Local Community Radio Act is perhaps the most significant victory for broadcast localism in decades. For LPFM to truly flourish however, the LPFM-Translator issue must be resolved. The best possible solution is to give priority to locally owned stations producing local content. Reserving channels for LPFM is essential. I would further urge you to consider treating translators as secondary to LPFMs in an effort to foster broadcast localism rather than continuing to encourage the growth of full power broadcast empires.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district and throughout Pennsylvania.

Sincerely,
